SUMMARY

Software engineer who ships complete web products, from React and TypeScript interfaces to Node.js, Supabase and Postgres backends, plus WordPress commerce for paying clients. Led the frontend of Lexort, a Nigerian legal case-filing platform, where an LL.B background helped turn court procedure into clear role-based workflows. Also teach coding and electronics.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, HTML5, CSS3
Frontend: React, React Native, Vite, Tailwind CSS, NativeWind, SASS, Framer Motion, Three.js, Figma-to-code
Backend & Data: Node.js, Express, REST APIs, Supabase, Neon (PostgreSQL), JWT auth, WebRTC, Streamlit, CSV/JSON
CMS & E-commerce: WordPress, WooCommerce, Elementor, Paystack
Tools & Deployment: Git, GitHub, Vercel, Render, Cloudflare, Resend, unittest, Claude Code
AI/ML & Hardware: Teachable Machine (image classification), Arduino, circuit building

EXPERIENCE

Lead Frontend Engineer | Lexort, legal case-filing platform 2026

- Led frontend development of a platform that digitizes case filing for the Nigerian legal system, building the React and Vite interface from Figma designs (live at lexort-admin.vercel.app).
- Built separate workflows for Admin, Chief Judge and Clerk roles, with each role's screens and permitted actions driven by backend REST APIs.

Coding & Electronics Instructor | Independent, part-time Jan 2026 – Present

- Design and teach one-on-one curricula from Scratch and programming fundamentals to web development, Python and app building, with weekly assignments.
- Teach Arduino programming and circuit building through hands-on builds, and introduce AI/ML by training and testing image classifiers.

Freelance Web Developer | Client projects May 2025 – 2026

- **Crown Babies** (crownbabies.com): built and maintained a WordPress/WooCommerce store for a maternity, baby and fashion retailer, with Elementor pages, Paystack payments, shipping rules, categories and WhatsApp support.
- Wrote a pipeline that turned raw WhatsApp-exported product data into WooCommerce CSV imports with automated image matching, loading 600+ products in batches.
- **Law Dinner** (lawdinner.vercel.app): React/Vite ticketing app with Supabase-backed ticket codes, an admin dashboard and a scheduled keep-alive ping so the free-tier backend never paused.
- **Monoche** (monoche.vercel.app): responsive React landing page for a photobook startup.

Team Lead, Coding Mentorship (Volunteer) | YE Network Aug 2025 – Nov 2025

- Led a mentorship team, coaching participants through HTML, CSS and React and connecting them with industry professionals.

Frontend Developer Intern | SkyeStudio Mar 2024 – 2025

- Built and maintained responsive web interfaces and React Native (NativeWind) mobile screens with senior developers.

SELECTED PROJECTS

PexyDrop | React, TypeScript, Node.js, WebRTC pexydrop.onrender.com

- Browser file transfer between nearby devices over an encrypted WebRTC data channel, with no accounts, installs or uploads.
- Falls back to a server relay after ~8 s when networks block direct links, with ECDH-agreed AES-GCM keys so the server only sees ciphertext; QR and expiring pairing codes lock out repeated wrong guesses.

Northstar Capital | React, Vite, Express, Neon, Render northstar-capital.onrender.com

- Full-stack investment platform with bcrypt/JWT auth, an admin role, deposits held pending until admin confirmation, and an email notification outbox.

Casebook Studio | Python, Streamlit casebookstudio.streamlit.app

- Law School study app with searchable case briefs, active-recall practice, a weekly study log and JSON/CSV backup, covered by unit tests.

EDUCATION

LL.B (Hons), Law | Lagos State University, Lagos, Nigeria 2021 – 2026

ADDITIONAL

Mobile hardware repair (freelance, 2020 – present): diagnose, repair and test smartphones and tablets.
